Application/Control Number: 10/711,996

Art Unit: 2627

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Applicant admitted prior art discloses a method for handling an interrupt request in an optical storage drive when the optical storage drive executes a control procedure or operation, the method comprising: utilizing the optical storage drive to receive an interrupt request from a control circuit (see [0005], Fig. 1) after execution of the control procedure or operation has begun; when the interrupt request is a read command, checking whether data indicated by the read command is stored in a buffer (see Figs. 1-2 and there descriptions); and when the indicated data is stored in the buffer, transferring the corresponding data to the control circuit from the buffer to respond to the interrupt request (see Figs. 1-2 and their descriptions).

Minami et al. (US 6,331,966) discloses a method for handling an interrupt request in an optical storage drive when the optical storage drive executes a control procedure or operation, the method comprising: utilizing the optical storage drive to receive an interrupt request from a control circuit after execution of the control procedure or operation has begun; transferring the corresponding data to the control circuit from the buffer to respond to the interrupt request in parallel with the execution of the control procedure or operation (col. 10, the seeking control can be simultaneously executed in parallel with the writing access or reading access in response to an upper command by the MPU 12).

None of the references cited in the record disclose or suggest the a method that checking whether the interrupt request corresponds to a read command; and when the interrupt request corresponds to a read command, checking whether data indicated by the read command is stored in a buffer.

Art Unit: 2627

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references relate to a command interruption is performed by executing the command of the reading or writing request from the host computer (US 5721717).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VAN T. PHAM whose telephone number 571-272-7590. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on 571-272-7582. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
